

Christopher David Marchand

Candidate for Student Representative to the QVCC Foundation.

- ✚ I believe that I am very gifted when it comes to leading people. I don't mean to narcissistic, but when it comes to taking charge of any situation, I feel that I am naturally on top of things. Also, I am a first born, so that may contribute to my leadership tendencies.
- ✚ I've never run for any type of Student Government, so I am relatively new to the idea and without much experience, but I am a fast learner, with a first-class work ethic. The "experience" that I do have stems from my interest in politics. I follow everything politically-related almost religiously. Due to this, I have a very extensive knowledge of the political system in the United States.
- ✚ I would like to see more trip-type activities. For example, the Boston trip coming up in April. I sense from my conversations with other students that they are of the same opinion. Students like the inexpensive day trips that have been offered so far, compared to musical artists that we have from time to time.
- ✚ I would publicize the "lunch token" incentive. I know that this is offered only from attending SGA meetings. I think that if this were better known to students, then they might be more willing to participate. Sort of like a "hook" to get the students involved for the first time.
- ✚ The only thing that I would suggest is more computers. I have occasionally come into the library, intent on researching for a paper, only to find that some class is using all the computers. Maybe if we had some more available, computers that could not be used to class time, then this would fix the problem.
